

NPIC/TSSG/RED-111-70
8 April 1970

MEMORANDUM FOR: Chief, Applied Photo Science Division, TSSG/NPIC
Chief, Advanced Technology Branch, RED/TSSG/NPIC

SUBJECT : Proposal Evaluation - Color Control Cell Design Concept

1. Proposals have been requested from five commercial concerns and the National Bureau of Standards for a Design Concept for a Color Control Cell, a facility in which to carry out photo interpretation and photo-scientific experiments on SO-242 and related color film products. The deadline date for submission of proposals was specified as 22 April 1970.

2. Your assistance in evaluating the anticipated proposals is solicited. To aid in preparing for this evaluation, the Development Objectives and references are attached. Evaluation of these competitive proposals should be made on the basis of feasibility of the concept, technical capability of the bidder, and price realism. The proposals will be delivered to you by the Project Officer [redacted], as received, and he will be available for discussion prior to and during the evaluation period. 25X1

3. A deadline date of 27 April 1970 has been assigned for this proposal evaluation in the FY-70 R&D Projects Schedule. It is requested, therefore, that your evaluation memorandum be returned to the Project Officer no later than close of business on that day. 25X1

Chie [redacted]
